Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Being disabled and stuck in a wheelchair for life due to a doctors mistake when i was only 25 years old with my whole life and a promising career as a corporate pilot ahead of me I am required to make 90 minute drives to the medical center in the next state down from ours, Pennslyvania for specialized medical care and rely on the fact that I have a Tracfone with me for any emergency that may arise. I hd one such emergency last year and had to propel myself along the interstate to use a phone 3 miles along the way due to my forgetting my phone...Please Please donot add any more charges to the`service. My family depends on the little monies that we have coming each month and budget accordingly. Any more charge will surely hurt us in the long run and many others. Why not tax those who use there phones over 200 monutes a month or more, we are lucky if we consume 40 never mind 200. If someone is using their phone 200 minutes a month or more they definately can afford 1.00 or 2.00 a month more...thanks for listening.  
Keep the USF Fair!

Sincerely,

George Rainboth
